

#### SUMMARY AND STANDARDS

#### Summary:

In this lesson, students will explore what Computer Science is and the basics of Scratch.

#### **ELA Standards:**

The student will read and demonstrateThe student willcomprehension of nonfiction texts.instructions (algorithm)The student will write in a variety of forms to includecollaborativelynarrative, descriptive, opinion, and expository.a) using sequea)Engage in writing as a process.b) using eventsc) Use a variety of prewriting strategies.b)d) Use organizational strategies to structure writingaccording to typeg)Use transition words to vary sentence structure

#### CS Standards:

The student will construct sets of step-by-step instructions (algorithms), both independently and collaboratively a) using sequencing; b) using events.

Optional: Introduce lesson, learning goals, and resources (Slides # 2-4)

## <section-header><list-item><list-item><list-item><list-item><list-item><list-item><list-item><list-item><list-item> Our series of the end of the end

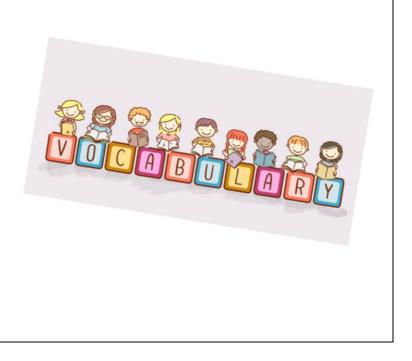

Optional: Introduce lesson, learning goals, and resources (Slides # 2-4)

# LESSON OBJECTIVES: I CAN... Identify objects in Scratch (add Sprites, add backdrops) Recognize that commands in Scratch are represented by blocks Describe characteristics of Computer Science (CS) Explore Scratch Log into Scratch and practice adding a project to a teacher's studio

Optional: Introduce lesson, learning goals, and resources (Slides # 2-4)

#### VOCABULARY

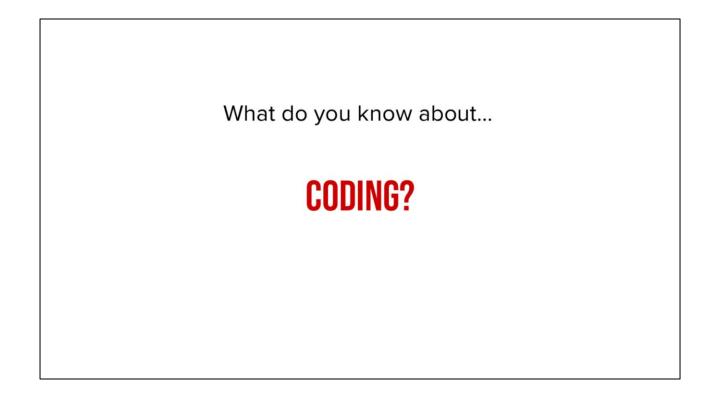

- ★ Commands
- ★ Code
- ★ Computer Science
- ★ Sprite
- ★ Backdrop

What do you know about...

## **COMPUTER SCIENCE?**

Ask students to share what they know about the following words: Computer Science

Ask students to share what they know about the following words: Coding

What do you know about...

## **PROGRAMMING?**

Ask students to share what they know about the following words: Programming

Next, explain that we are going to be learning more about Computer Science and share the video (Watch until 1:09) (slide #9) <u>https://youtu.be/HsXaVV6fFDY</u>

#### **COMPUTER SCIENTISTS**

**Computer scientist (n):** a person who studies computers and how they can be used to solve problems.

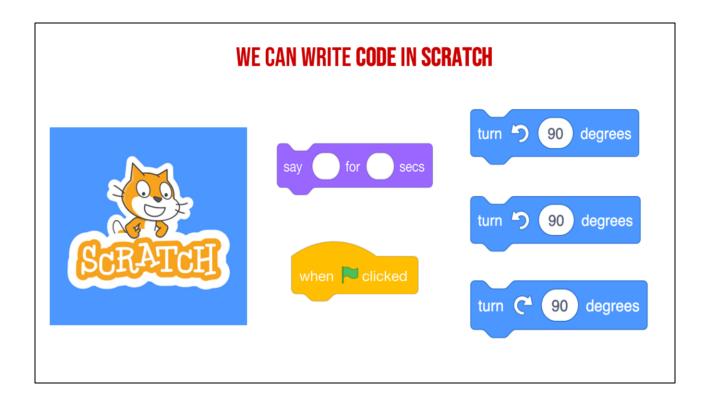

Introduce what a computer scientist does (slide 10)

### **COMMANDS:** Tell a person or computer what to do

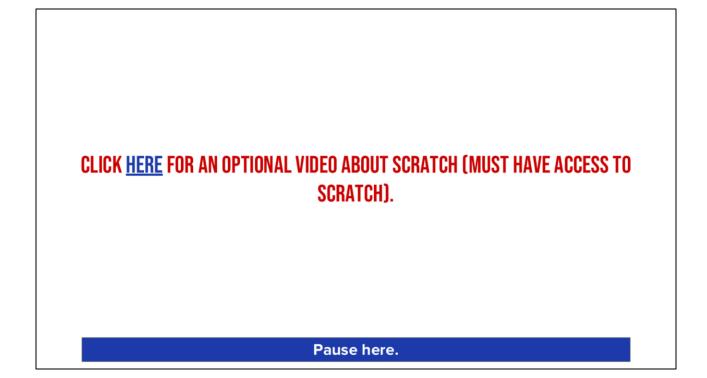

Introduce vocabulary slides: Commands

### **CODE:** THE LANGUAGE THAT COMPUTER SCIENTISTS CREATE AND USE TO TELL A COMPUTER WHAT TO DO.

Introduce vocabulary slides: Code

Introduce Scratch - Explain that Scratch is a program that you can use to code and create interactive stories, games, and animations.

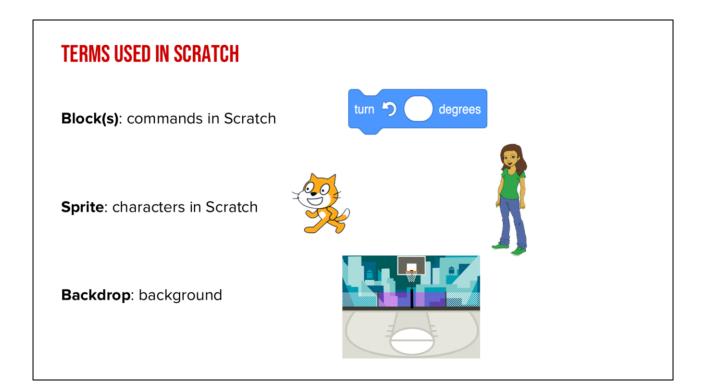

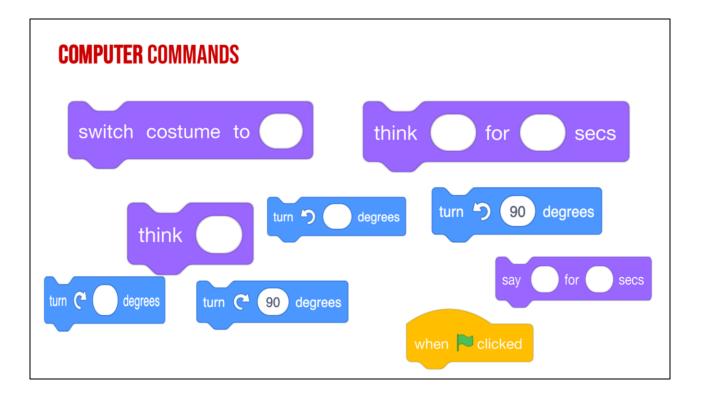

First, let's learn a little more about Scratch

Scratch - Imagine, Program, Share

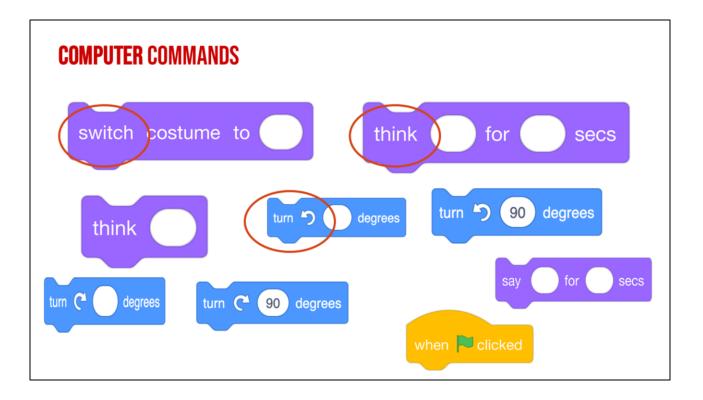

## **GUIDED PRACTICE**

## CODINGINSCROTCH

"Has anyone seen these types of pieces anywhere before? (from warm up) These pieces are actually computer "commands." **Command**s tell a person or a computer what to do.

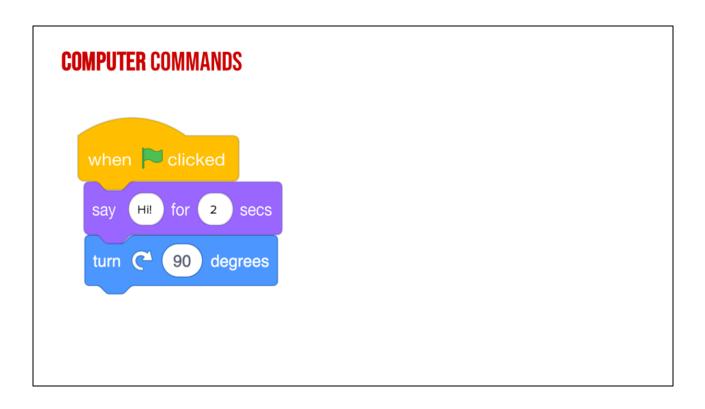

Lets look closely at these blocks again and what they say-

Click "switch,

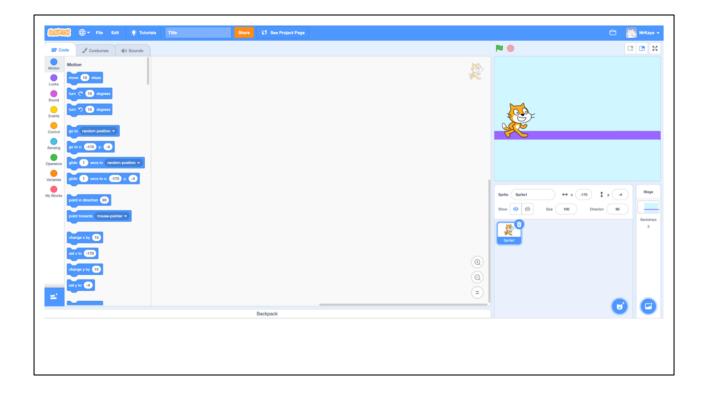

Click "think,

Click "turn

"these are commands" written in Scratch code, which is the kind we will be working with. We put these commands together in Scratch by snapping the together the blocks so they hook onto each other like puzzle pieces. This allows us to code multiple commands in a single set of instructions.

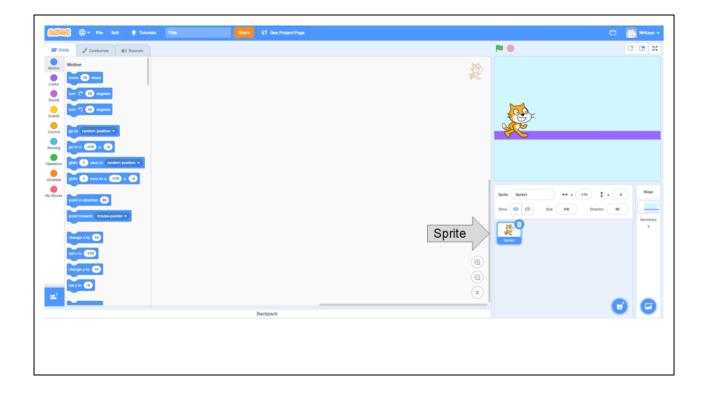

For example, these Scratch commands have been put in the correct order from top to bottom you have created a sequence of instructions. This would tell the computer to say Hi for 2 seconds then turn right 90 degrees.

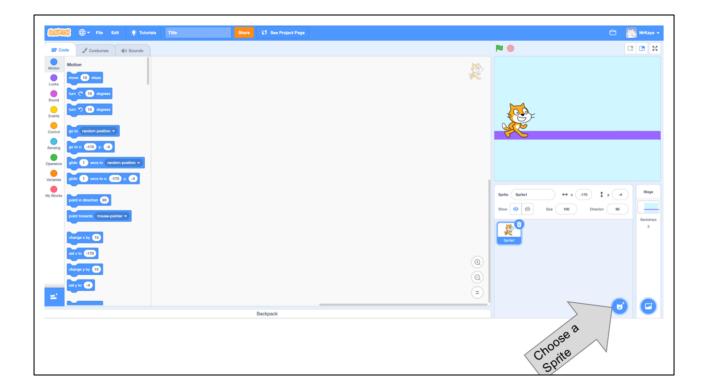

Guide Students through the main areas of the Scratch page "When you open Scratch, your screen should look like this."

| 🛄 🌐 🕈 Filo Edit 🔅 Tu  | visis Title Share () See Project Page |                           | 🗅 [] мж |

| Code 🥒 Costumes 📢 Sounds  |                                       | P4 😐                      |         |
| Motion<br>Force 10 stops<br>Lett 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1  |                                       |                           |         |
| A profession of the section (and composition of the section o | Script Area                           | Prov 💿 🖉 Exe 100 Director | y 4 80  |
| changes y by 😰  | Backpack                              | 0<br>0<br>=               | 0 0     |

"This main area in the center of your screen is the script area. This is where you drag you command block and join them to build your algorithm. You will find your command blocks on the left side of the screen and drag them to the center. If you decide that you do not want a certain block, drag it back to the left. We will learn more about this in a moment."

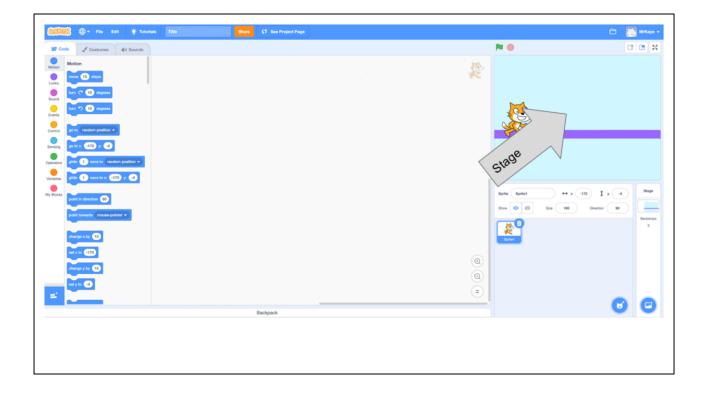

"In SCRATCH, an object, author, or character in a story is called a **Sprite**. The sprite you can see right now is Scratch the cat. The box here is blue because this is the sprite that is currently being coded. If this box is not blue, you will not be able to add any command blocks for your sprite."

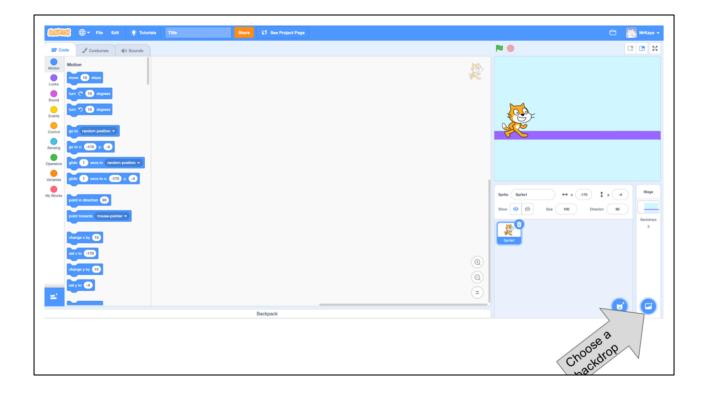

Introduce and explain to create/add Sprites and Backdrops

"If you want to add another sprite or change sprites, you can click here, the small circle with the cat image and plus sign. The new sprites you add will appear in this box. But you can only add code for the sprite that is selected and is in the blue box."

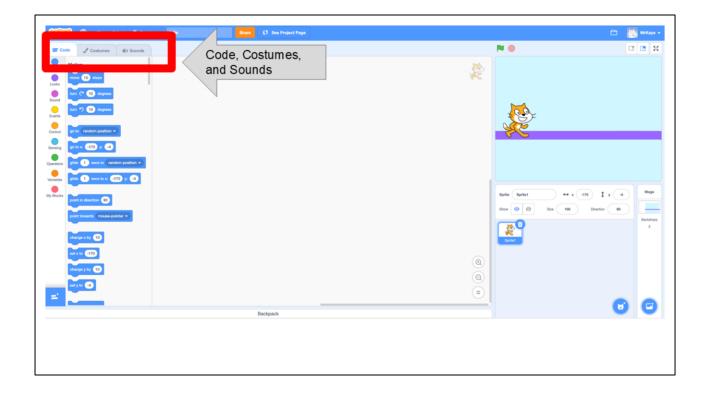

Introduce and explain to create/add Sprites and Backdrops "You can see scratch the cat here on the stage. When you run your code, this is where you can see the action."

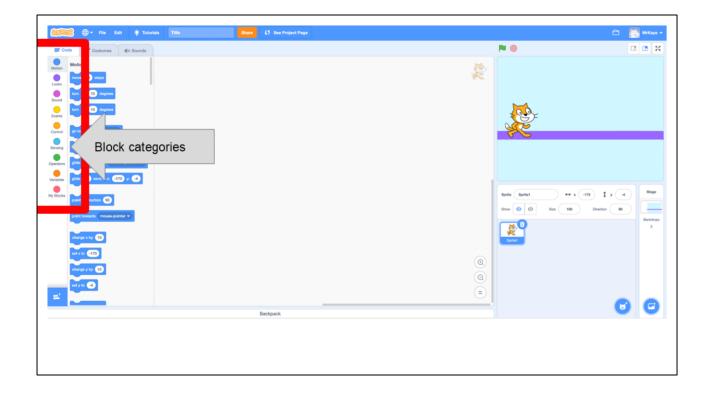

Introduce and explain to create/add Sprites and Backdrops

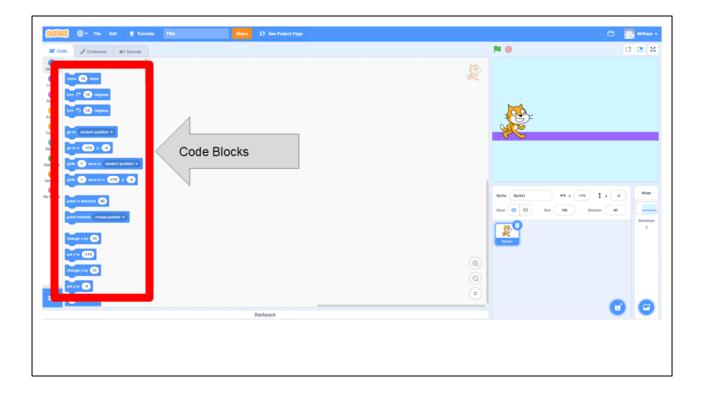

"If you want to change your background or your backdrop, as it is called in scratch, you can click here. It looks like a small picture with a plus sign."

"In the upper left, you can see three different tabs. Code, Costumes, Sounds. Choose the code tab to build code from command blocks. Choose the costumes tab to change how your sprite looks. Or you can add new sounds to sprites here."

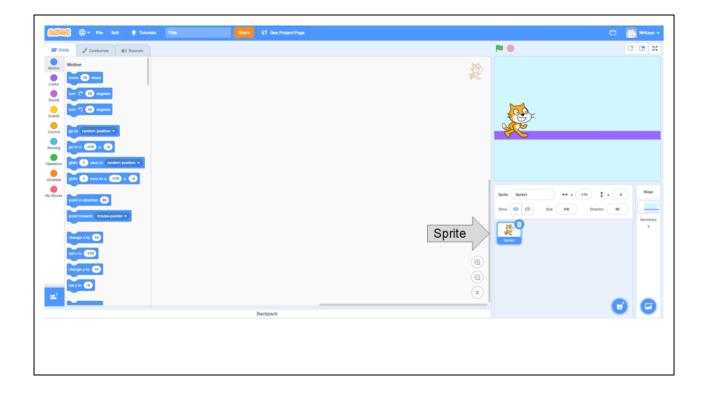

"Let's look closer at the code blocks. On the far left you can see several colored dots (some also call it categories palette). These are the different types of code you might want. You can choose motion, looks, sound, events..they are all different colors to help you. You can choose just one block category."

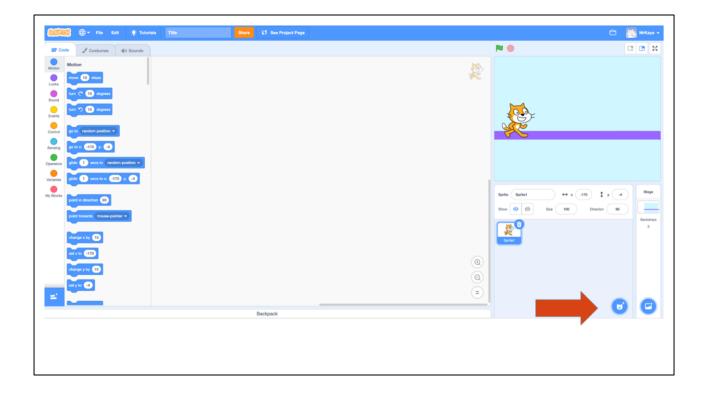

"Once you choose your category, the code blocks will appear here and you can find the specific command that you would like to give your sprite. Once you drag your code to the stage and click them together, you are ready to try it out."

## CHANGING SPRITES & BACKDROPS

Okay, remember that in SCRATCH, an object, author, or character in a story is called a **Sprite.** The sprite you can see right now is Scratch the cat. What if we wanted to change our sprite to another animal?

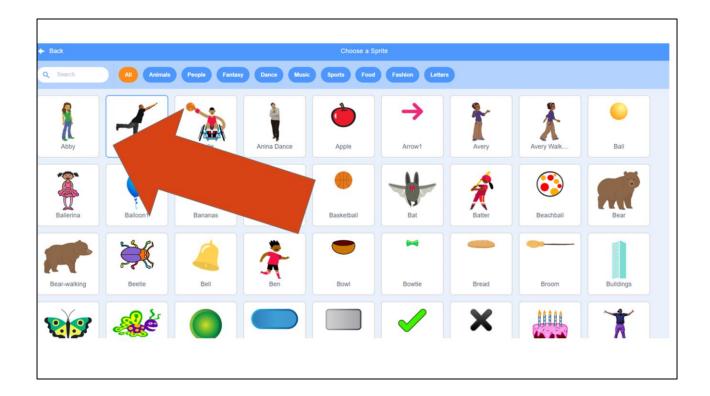

Okay, remember that in SCRATCH, an object, author, or character in a story is called a **Sprite.** The sprite you can see right now is Scratch the cat. What if we wanted to change our sprite to another animal?

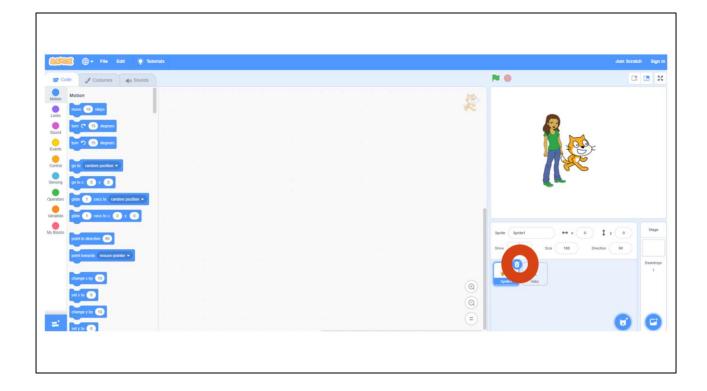

First, we would click on the sprite icon.

| Back         |             |                |             | Choose a Sp | vite  |                   |            |           |
|--------------|-------------|----------------|-------------|-------------|---|-------------------|------------|-----------|
| 2 Search     | All Animals | People Fantasy | Dance Music | Sports Food | Fashion Letters   |                   |            |           |
| Âbby         | Amon        | Andie          | Anina Dance | Appie       | Arrow1  | <b>k</b><br>Avery | Åvery Walk | Ball      |

| Bear-walking | Beetle      | Bell           | Ben         | Bowl        | Bowtie  | Bread             | Broom      | Bulldings |
| ছাঁক্ত 🗸     | <b>€</b> €  |                |             |             | <ul> <li>Image: A start of the start of</li></ul> | X                 |            | *         |

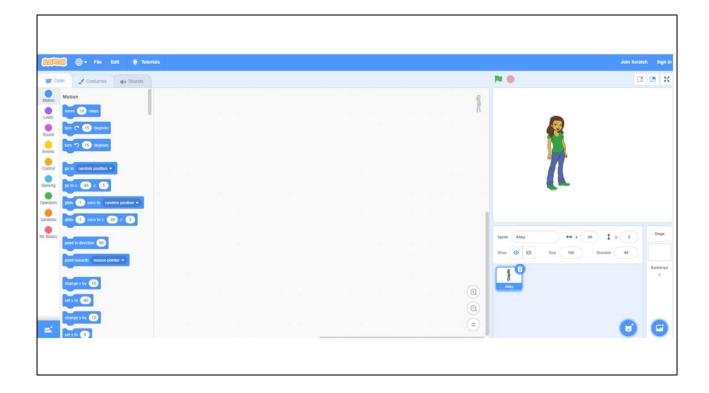

Then, we would have ALL these sprites to choose from.

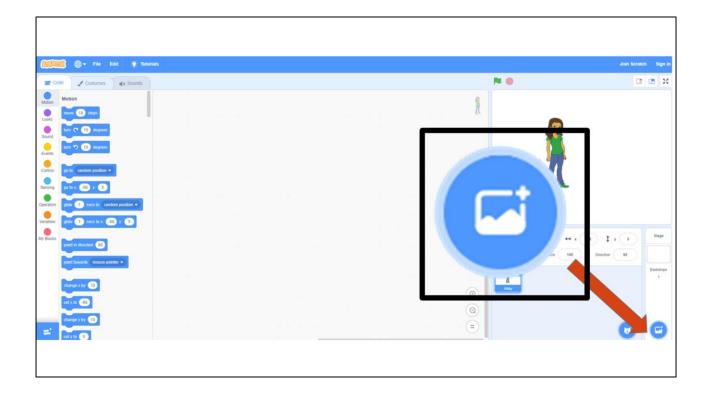

We change our sprite by clicking the one we want.

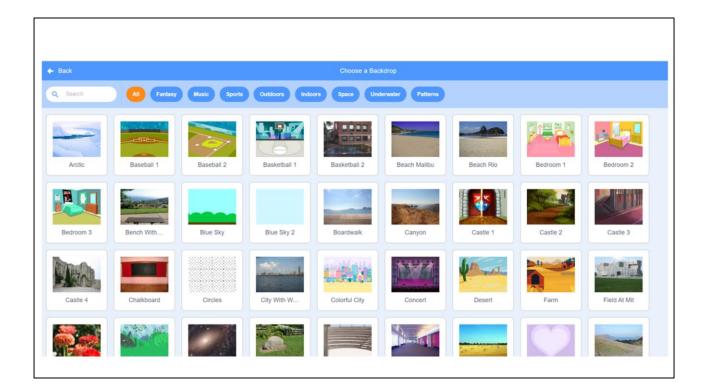

But don't forget to delete the other sprite! So you have only the one you want.

But don't forget to delete the other sprite! So you have only the one you want.

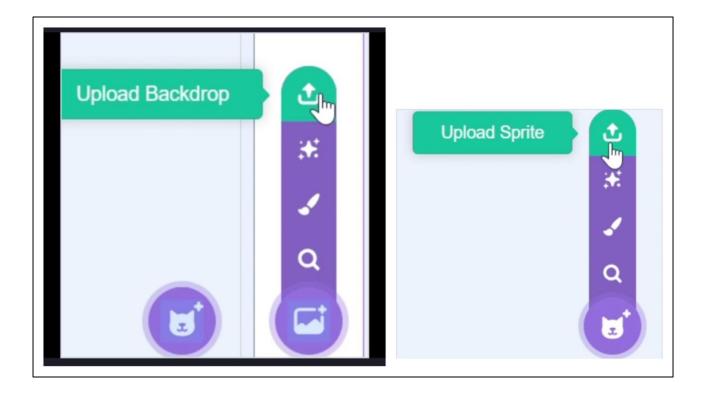

To add your own backdrop, follow the same steps but click this icon instead. You'll see lots of options to choose from appear.

To add your own backdrop, follow the same steps but click this icon instead. You'll see lots of options to choose from appear.

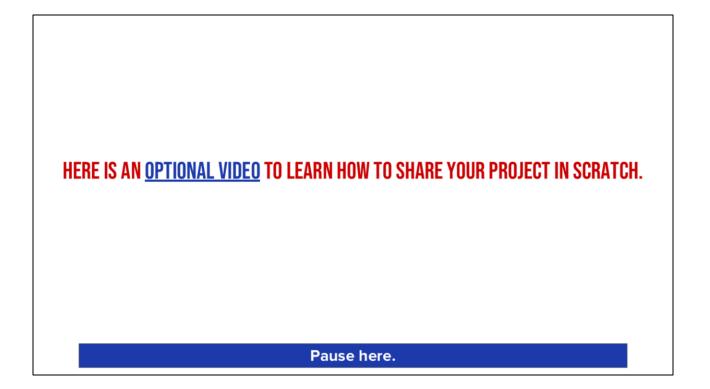

## ADDING YOUR \*OWN\* SPRITE OR BACKDROP

There are lots of great sprites and backdrops to choose from in Scratch. However, if you can't find what you're looking for, it is also possible to upload your own sprites or backdrops.

|    | SHARING YOUR .SB3 FILE FROM CS FIRST TO COCO  |  |  |  |  |  |  |
|----|---|--|--|--|--|--|--|
| 1. | Create the file in CS First   |  |  |  |  |  |  |
| 2  | In the Scratch editor, find the word "File" in the top-left corner.   |  |  |  |  |  |  |
| 3  |   |  |  |  |  |  |  |
| 1. | Choose "Save to your computer." This will download your Scratch project.  |  |  |  |  |  |  |
| 1. | Look in your "Downloads" folder. That's where your saved project might be.  |  |  |  |  |  |  |
| 1. | Go to the CoCo website and log in to your account. https://wego.gmu.edu/scratchgo/login.php   |  |  |  |  |  |  |
|    | Ready to Work on Your Story?  |  |  |  |  |  |  |
| 1. | Click proceed on the correct story in CoCo.   |  |  |  |  |  |  |
| 1. | Story 3         Provest           Navigate to the section of CoCo where you can upload your project. (only sb3 type and 10Mb max).         Uploading your coding file (only sb3 type and 10Mb max): |  |  |  |  |  |  |
| 1. | Click "Save".   |  |  |  |  |  |  |

Model how students can share Scratch creations to their teacher's studio

Video modeling how students can share Scratch creations to their teacher's studio <u>https://www.dropbox.com/scl/fi/k2t7ydsi6sdans7gohpft/Student-How-To-Add-A-Project-To-A-Studio-In-Scratch.mp4?rlkey=6jmehhmfutgb3jiirjxynvf29&st=cifroqna&dl=0</u>

Scratch - Imagine, Program, Share

#### **INDEPENDENT PRACTICE**

- 1. Log into Scratch.
- 2. Add a sprite and a backdrop.
- 3. Share your project with your teacher's studio.

- 1. Students will practice logging into Scratch and adding a Sprite and Backdrop
- 2. Students should also practice sharing their Scratch project with their teacher's studio

Teacher should monitor and check for correct sequencing during the independent practice activity.

#### **OPTIONAL: UPLOAD YOUR OWN SPRITE & BACKDROP**

Upload a sprite and backdrop that shows

1) a place you would like to visit or

2) a scene/setting from your favorite story

## ANYONE CAN BE A COMPUTER SCIENTIST!

Share the "Careers in Tech" Video and remind students that anyone can be a computer scientist! <u>https://www.dropbox.com/scl/fi/xpni0btxu64wc7lxduu6g/Careers-in-Tech\_-My-name-is-Tess.mp4?rlkey=x1o44aiohshmolc95kubxpwwv&st=6pnvlwwf&dl=0</u>
